11. A daily remittance report should be sent to the County for all incoming and outgoing ACHs, EFTs, and Wire Transfers.
12. Stop Payments - The County will require the bank to issue stop payments executed from personal computers or fax by County personnel at County locations. Stop payments will be considered permanent voids and the County does not need to renew stop payments. The Depository Bank’s electronic system must allow for County personnel to search, delete, and adjust items as needed.
13. Checks, Deposit Slips, Endorsement Stamps, and Other Supplies - The bank will order supplies for the County as specified by the County. Any applicable charges should be directly invoiced to the County Treasurer, not paid by direct debit.

14. Account Executive Service Person - The bank will provide Galveston County with an Account Executive Service person located in Galveston County whose responsibility must be to serve as primary liaison between the bank and Galveston County. This person will be responsible for attending to inquiries, requests for services, researching historical data, and other daily activities regarding the managing of Galveston County Accounts.

15. Reconciliation - The bank agrees to reconcile any differences in account balances within a period of time mutually agreeable to both Galveston County and the bank following notification of such discrepancies. Differences in account balances include any difference between checks paid in comparison to positive pay amounts transmitted to the bank, and differences between deposits made (declared) as compared to deposits verified by the vault.

16. Waiver of Certificates of Deposit Penalty – The County and District Clerks maintain trust accounts for minors. These funds are invested in Certificates of Deposits to earn interest for the minor’s benefit. Occasionally these accounts are closed by court order prior to the maturity date of the CD. The bank must waive the early withdrawal penalty if a minor’s trust account is closed by court order prior to the CD’s maturity.

17. Deposits – The bank must accept mixed deposits containing cash, checks, and coin from the County. Deposits may be made primarily through the vault (armored car); branch teller walk-up is minimal.

Online information reporting for these accounts should be made available.

20. Deposits at Branch Locations – The bank must allow designated County personnel to make deposits at any branch location.

21. Overdrafts - All demand deposit overdrafts incurred in the normal course of business will be covered at no cost to the County as long as sufficient compensating balances exist in other County accounts.

25. Armored Car Depository Service – Please include a service and charge breakdown for services related to picking up and dropping off funds from various County locations. Include a sample invoice for these services, or indicate where on the monthly analysis this charge is located.
26. Lockbox Services – Does the bank provide directly, or via contract with a third-party, lockbox services? Please provide figures for how many pieces of mail can be processed per day, staffing of the facilities, and equipment used in the facilities, along with a description of the location of the lockbox facility.
27. Virtual Services – Can the bank provide a locking safe for virtual vault/safe services, wherein funds are deposited into a safe located at a County office, credited to the County’s bank account, and then retrieved at a predetermined time by an armored car depository service?
28. Safekeeping Account - In the event that the County exercises its right to make external investments, **the depository institution must provide a safekeeping account to hold securities purchased by the County.** If the Depository Bank cannot provide investment safekeeping services, then the County will also have to select a second depository for those safekeeping services. Excess funds are invested in accordance with the County’s investment policy and the Public Funds Investment Act. All investments are on “delivery versus payment” where the safekeeping entity verifies the incoming security to the purchase instructions provided by the County. If the security matches the purchase instructions, the safekeeping entity releases the funds to purchase the security. If the safekeeping entity is not the County’s main depository bank, then funds would need to be transferred into the safekeeping account the day before the security delivery date. Any cash funds in the safekeeping account would either have to be collateralized at 110% per the County’s depository collateral requirements, or swept into an interest-earning money market account. The safekeeping entity will provide transaction notices for any interest payments received on investments, investments maturing, sold or purchased, and monthly safekeeping account statements. The report shall contain security descriptions, par value/current face and current market value as well as any interest earned on funds in the account.
****Refer to the COLLATERAL & SAFEKEEPING section for more details****
29. Please attach a copy of your Disaster and Emergency Preparedness Plan.

Pricing

Please quote prices and discounts on the following items:

1. Comprehensive List of Service Prices – The bank must provide a comprehensive list of service prices as well as any other costs that will be charged to the County for any reason. Specify any and all costs associated with electronic transfers, including transfers between Galveston County accounts. This list will be considered all-inclusive and the prices shown on the list must be incorporated into the contract. If a four (4) year contract is executed, the bank has the option to change prices for the second two (2) year term. The price change will be negotiated, but may not exceed 110% of the prices shown for the first two (2) year term.
2. What is the cut-off time to ensure a same-day ledger credit?
3. Provide an availability schedule.
4. Does the bank outsource any of the proposed services?
5. What are the bank's cut-off times for customer-initiated Electronic Transfers (Wires, ACHs, Account Transfers, etc)?
6. Comprehensive Cash Management Capabilities – The bank must provide comprehensive cash management programs and associated costs (e.g., electronic check presentment, check conversion, stored value cards, etc).
7. Does the bank offer any service to protect Galveston County's accounts from unauthorized ACH debits?

12. Describe security at the cash vault center. What additional security measures are employed?
13. Does the bank identify and adjust all discrepancies?
14. When deposit discrepancies are discovered, what are the bank's notification, reporting, and adjustment procedures?
15. Required Form (See Form D) - On the attached form titled **FEE CALCULATOR BID**, indicate the charges per unit for each service, the estimated charges for each service, and the estimated compensating balance which the County would be required to maintain in order to offset the service charges. Specify when there is no charge for a service or when there are additional charges for a service. List any fee or service charges that you foresee, even if not listed in the **FEE CALCULATOR BID**.
The number of units on the form represents Galveston County's bank services activity for fiscal year 2018.
16. Required Form (See Form E) - On the attached form titled **INTEREST CALCULATOR BID**, calculate the interest Galveston County would have earned last fiscal year using your proposed rate of return historical data. Galveston County is requesting for bank applicants to define specifically the method used by the applicant for interest calculations in its normal operations. Galveston County must be able to independently calculate the proposed rate and interest payable under the contract. Also, specify which bank balances are subject to interest (e.g. Average Collected Balances).

Because a four (4) year contract may be executed, the bank must propose new fixed and variable rates of interest for interest-earning transaction accounts, certificates of deposit, NOW accounts, money market checking accounts, and the overnight investment facility for the second two years of the contract. During the second two (2) years of a four (4) year contract, Galveston County has the option to adopt the bank's proposed rates for the last two years or to establish, on the basis of negotiations with the bank, new interest rates and financial terms of the contract that will take effect during the final two years of the four-year contract.
